

Introducing the first Bluetooth hands free car kit with a color LCD

The Parrot CK3100 LCD is the most renowned hands-free car kit on the market. With the Parrot CK3100 LCD, you will be able to place and receive calls in comfort and safety, without ever touching your mobile phone.

The wireless connection between the Parrot CK3100 LCD and the Bluetooth phone and its voice recognition system is enabled as long as the phone is turned on.

At a time when legislation is tightening up to restrict the use of mobile phones in vehicles due to safety concerns, Parrot CK3100 LCD benefits are not just for the sake of convenience and comfort - they are fast becoming a real necessity.

Make calls in complete safety with the voice recognition feature

When users get in their car, they start the engine and the kit immediately connects to their mobile phone. Thanks to the voice recognition feature of the Parrot hands free car kit, drivers say a name and the kit automatically dials the number.

Choose a hands free car kit that integrates seamlessly into your car for real audio quality

The car's speakers accurately reproduce the caller's voice. The external microphone captures the sound of your voice while filtering out the surrounding noise. In the event of a call, the car radio automatically cuts out to allow for a smooth conversation.

Find your mobile phone's information on the LCD screen

The Parrot hands free kit displays your mobile phone's information on an LCD screen : incoming call number, phonebook, last number called, and so on. The ingenious screen can be installed wherever users want on the dashboard and provides an optimized viewing angle for greater comfort and readability.
