

Towmaster Annual Inspections

In the interest of your safety, and to ensure your warranty cover, We require seeing the converted towcar every 12 months for a safety inspection.

The inspection will consist of:

- Removing the bumper to inspect for fatigue of the towing adaption.
- Inspection of the Towmaster A Frame and all associated parts.
- Inspection of, and ensuring the braking system operation and set up is correct.

There will be a labour charge for the time spend by the fitting centre for conducting the safety inspection at the normal labour rate charged at that time.
