# Towbars

## Specialist in Motorhome Towbars

LNB Towbars import and stock type approved towbars from Germany, Holland, France and the UK.

We carry towbars in stock to fit most UK and European motorhomes on the market which means you can give us a call with your motorhome details and its likely we will have your towbar in stock and ready to go.

It is important that you have the correct fitting towbar for your vehicle and if your motorhome is newer than 2012 that it's the type approved towbar for your vehicle's chassis.

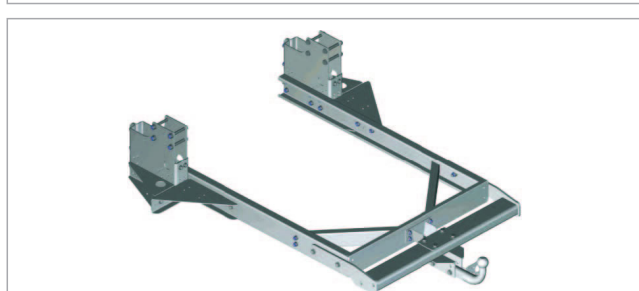

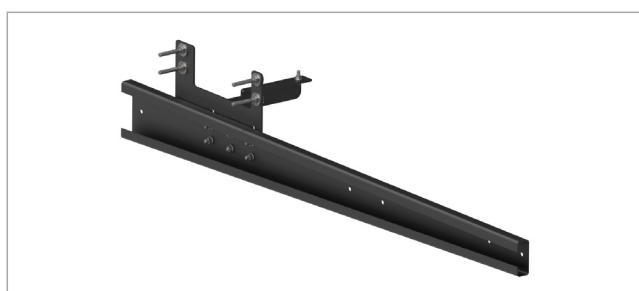

At LNB Towbars we keep a database of vehicles so that in most cases we know exactly what fits, how much it will cost you and whether it is in stock.

Specialist or older motorhomes may need to be seen by our team to measure and identify which towbar is best suited to the vehicle.

Our experienced team of technicians are fitting motorhome towbars every day and carry a vast knowledge and expertise to ensure that your towbar fitting is of the highest quality. LNB Towbars also supply towbars to motorhome dealers and other towbar specialists across the UK.

Whatever your towbar needs, give our professional team a call.

Suppliers of:

# Towbars

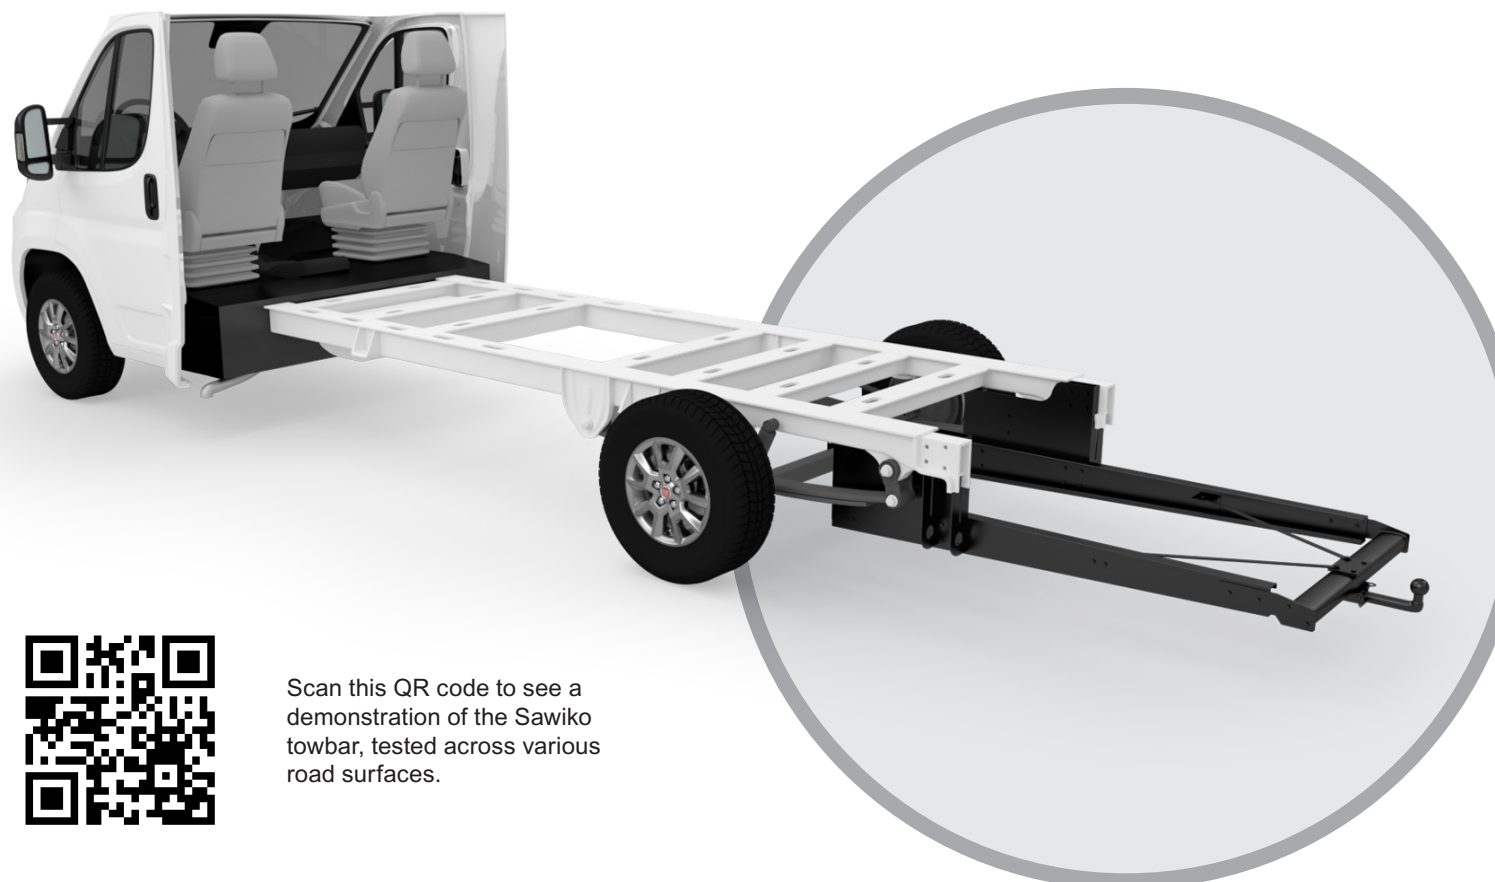

## Specialist in Van Conversion Motorhome Towbars

LNB Towbars fit European Type Approved towbars to van conversion motorhomes, so no matter what size your leisure vehicle, we accommodate all. We fit these to a range of vehicle manufacturers, such as: Fiat, Peugeot, Citroen, Ford, Mercedes, Volkswagen and Renault. All motorhome towbars installed by LNB Towbars include a dedicated 13pin electrics kit specific to your vehicle chassis.

The most common type of motorhome towbar is a swan neck style. However, some motorhomes can be fitted with either a detachable swan neck or flange style.

Please ask a member of our team for the towbar options for your vehicle.

# Towmaster 2 A-Frame

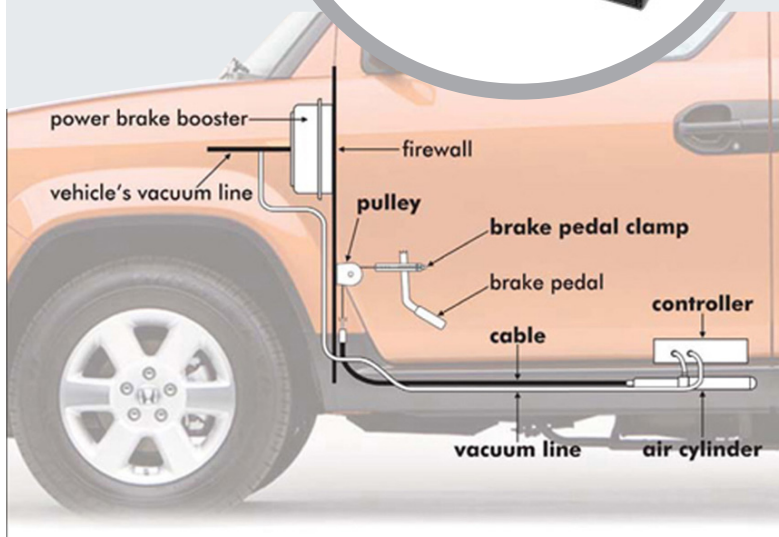

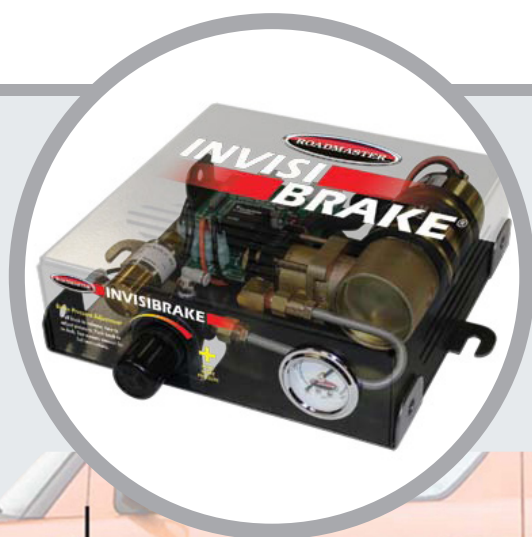

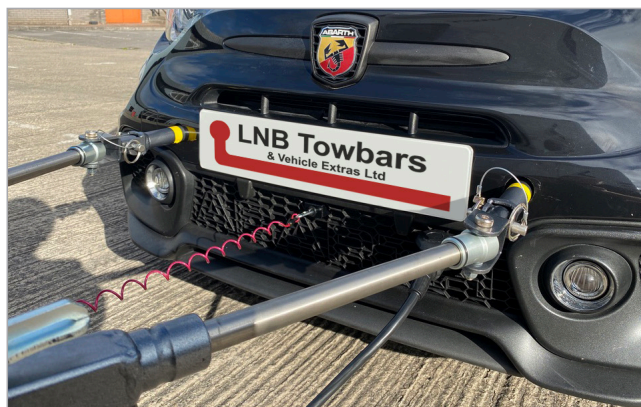

## Britain's quickest and easiest to use A-Frame

Our EZ Lock System is now even stronger and faster to attach.

- **Anti Binding** – Release levers make it easy to release under pressure.
- **Coupling** – Fitted with the ALKO AK270 Coupling.
- **Powder Coated finish** – Baked on metal fleck for better protection.
- **Storage** – Folds away for EASY storage. Invisible when not towing.
- **Fully-tested** – FEA & Destruction Tested.
- **Optimal length** – 1.2m long to avoid jackknifing.
- **Unobtrusive** – Discreet when removed.
- **Safety** – Maintains NCAP Safety features.

**Ask for a list of the cars we do.**

Suppliers of:

## What is InvisiBrake?

InvisiBrake is a fully automatic, pre-set, progressive supplemental braking system that uses the electrical connections already in place on your towed vehicle to brake when you brake in the motorhome.

- **Completely out of sight** – Invisibrake is so small it can usually be mounted under a seat without sacrificing useable space.
- **Progressive Braking** – When you continue braking, so does InvisiBrake. The longer you apply the brakes in the motorhome, the harder your towcar brakes.
- **Trickle charge the battery** – It connects directly to the towed vehicle's battery and constantly charges the battery during towing.
- **Two staged motorhome monitor** – Invisibrake includes an LED monitor for a visual reference of braking activity; an audible alert warns you if the towcar brakes have been active for too long.

## How does InvisiBrake work?

1. The controller receives a braking signal from the motorhome.
2. The vacuum created by the controller activates the power brakes.
3. The air cylinder pulls a cable which applies the brakes.

# Towmaster 2 A-Frame

## Why use an A-Frame?

Many places we like to visit in our motorhomes are not always that suitable for larger vehicles. There may be narrow streets, limited parking, height restrictions, expensive parking and more that are inconvenient for a motorhome.

Using a towcar can give you the freedom to explore, without any of the listed problems above and without having to disturb your pitch set up. Also useful for sites that do not have reserved pitches.

Some may say it's a bit like caravanning, but the difference is that instead of having to buy an expensive vehicle that is large, heavy and fuel thirsty. You can have the benefit of a small easy to park, cheaper to buy and fuel economic vehicle, that is beneficial for your day-to-day use, and you can still just use the motorhome on occasions that you do not require a towcar.

## Towcar A-Frame vs Trailer?

A towcar is much more stable to tow with its widely separated axles, when using the cars braking system the towcar has a far superior braking efficiency over a trailer and has no pushing and pulling effect.

A towcar also has a lower centre of gravity and is unlikely to snake like a trailer could. However, it is a conversion to that vehicle alone and cannot be used with another vehicle that has not been converted. So, if you change your towcar regularly a trailer may be the most cost-effective solution for you.

Trailers have a higher centre of gravity, less efficient brakes, are prone to snaking, are larger to store at home and away, and are more to maintain. However, they do offer the benefit of being able to take a different car. In fact, any car that fits the trailer without the need for any converting of the vehicle.

## Am I legal in the UK?

The UK department for transport recognises a towcar on an A-Frame as a trailer.

There are many technicalities, which cause many systems to be non-compliant but the biggest two requirements are:

1. You must achieve a minimum of 50% braking efficiency across all four wheels;
2. If the trailer has power/vacuum-assisted brakes then the system must be operable.

**IF YOU'RE A-FRAME SYSTEM COMPLIES WITH THE CURRENT TRAILER LEGISLATION, THEN YOU ARE LEGAL IN THE UK.**

## Am I legal in Europe?

Countries like Spain and Germany have local laws that state you may not tow a motor vehicle with another motor vehicle unless an authorised breakdown vehicle.

1. You will not be towing a motor vehicle. You will be towing a car that is converted to a trailer that complies with all EU trailer legislation. That is identified by the reflective triangles, towing vehicles number plate and the lights duplicating that of the towing vehicle.
2. Their local laws apply if you are a resident and have lived there greater than 6 months, or if your vehicle is registered in that country.
3. If you are travelling for less than 6 months in that country; no state has the power to reclassify a vehicle travelling from another state. As a visitor from another state, you are legal under the powers of international traffic as defined in the Vienna convention, as long as the combination of your vehicles are legal in your home country.
4. Your local police officer may not be familiar with international traffic and far more familiar with their local laws, and as such it is possible that you get stopped. This is why we provide translated documents explaining what you are towing and its legality, to produce if needed. The reality is that far fewer people are stopped than is made of by gossip and the internet. Often the people that are stopped are either, not compliant and therefore rightly stopped, or stopped for some other reason.

# I Motorhome Levelling

## HPC Hydraulic Levelling Systems

LNB Towbars are the UK importer and distributor for HPC Hydraulic Levelling Systems. HPC Levelling is one of Europe's highest quality levelling systems available. You will see HPC fitted to the highest quality motorhome brands, such as Concorde, Morello, Frankia, RS and more.

- Level in under 90 seconds.
- No more driving up ramps in the mud.
- No more rocking and rolling in the wind or when moving in your motorhome.
- No more uneven cooking surfaces.
- No more shower drainage issues.
- Makes changing a wheel or fitting snow chains easy.

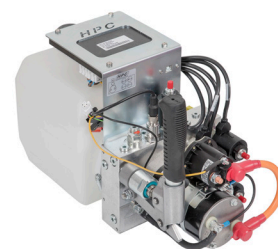

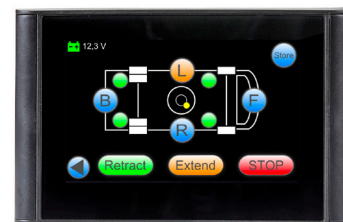

### Features Include:

- Touch screen control levelling.
- Four levelling positions (Level 1, Level 2, Tank Drain and Stabilise).
- Ultra-Lightweight.
- Anodised Aluminium Jacks.
- Smart Phone App Control.
- Emergency Pump Handle.
- Manual Adjustment, extend and retract.

For a great value, expertly installed, high-quality levelling system, look no further.

We have compatible kits for various types of chassis including: Fiat, Peugeot, Citroen, Ford, Mercedes, Iveco and Volkswagen / Man bases.

Ask one of our team for more details.

# Motorhome Levelling 1

## What is a Self-Levelling System?

A motorhome levelling system allows you to level your motorhome at the touch of a button or via your phone. It also comes with other convenience features like emptying your grey waste, stabilisation and much more.

## Can it be fitted to any motorhome?

HPC have developed brackets for nearly all types of vehicle chassis, including Fiat, Ford, Mercedes, Iveco, Volkswagen and Renault. Also, for Alko AMC and Super-Light motorhome chassis.

## Is there a maximum weight?

On a standard HPC motorhome levelling system, each of the four jacks can support up to 3Tonne, totalling a capacity of 12Tonne. For larger vehicles there are hydraulic jacks that can support up to 10Tonne each, totalling 40Tonne capacity.

## How long does it take to fit a Self-Levelling System?

HPC levelling typically takes 1-3days depending on the vehicle to be installed. Contact our team with your vehicle details for expected fitting time for your vehicle.

## How much does a Self-Levelling System weigh?

For most motorhomes the HPC Levelling Kit, once installed, weighs approximately 40kg.

## Does it come with a guarantee?

Yes, all HPC Levelling systems fitted by LNB Towbars Ltd. comes with a 3-year warranty.

# Motorhome Carriers

## Bicycle & Motorcycle Carriers

At LNB Towbars we import and fit a wide range of Motorcycle and Bicycle carriers suitable for motorhomes. The carriers that we provide all have different features to ensure we have a carrier suited to your needs.

For details, please speak to a member of our team.

### Liberco Apoyo Carrier

Technical specifications:

- Payload: 150kg
- Carrier weight: 39kg
- Size approx: W 200mm x D 500mm x H 950mm
- Chassis Mounted

### Liberco 110M Carrier

Technical specifications:

- Payload: 110kg
- Carrier weight: 28kg
- Size approx: W 1950mm x D 525mm x H 950mm
- Chassis Mounted

### Sawiko Compact-line Carrier

Technical specifications:

- Payload: 130kg
- Carrier weight: 38kg
- Size approx: W 2000 x D 300/750 x H 1200
- Chassis Mounted
- Foldable

### Memo Europe Zorro Carrier

Technical specifications:

- Payload: 150kg
- Carrier weight 40kg
- Size approx: W 1950mm x D 300/700mm x H 525mm
- Chassis Mounted
- Foldable

- Payload: 110kg
- Carrier weight R2: 25kg R4: 29kg
- Size approx: W 1950mm x H 950mm x D R2: 450mm R4: 720mm
- Chassis Mounted

## Libерco Socorro A500 Carrier

Technical specifications:

- Payload: 130kg
- Carrier weight: 46kg
- Platform: 1720mm x 495mm
- Size approx: W 1820mm x D 650mm (0mm) x H 950mm
- Chassis Mounted
- Slide Out

## Libерco Profold Bicycle Carrier

Technical specifications:

- Payload: 75kg
- Carrier weight: 28kg
- Wheel rail length: 1630mm
- Size approx: W 1600mm x D 580mm (280mm) x H 1040mm
- Chassis Mounted
- Foldable

## Libерco Profold A500 Bicycle Carrier

Technical specifications:

- Payload: 75kg
- Carrier weight: 31kg
- Size approx: W 1600mm x D 580mm (280mm) x H 1040mm
- Chassis Mounted

# Motorhome Carriers

## Bicycle & Motorcycle Carriers

At LNB Towbars we import and fit a wide range of Motorcycle and Bicycle carriers suitable for motorhomes. The carriers that we provide all have different features to ensure we have a carrier suited to your needs.

Some people may want a **Towbar-mounted carrier** for their existing towbar, that can be transferred to another vehicle.

We provide Towbar-mounted carriers for this very purpose.  
**For details, please speak to a member of our team.**

Suppliers of:

### Sawiko Agito 2 Carrier

Technical specifications:

- Payload: 150kg
- Carrier weight: 95kg
- Size approx: W 2000mm x D 600mm
- Hinge Mounted
- Swing Out
- Foldable

### Sawiko Van-Bike 2 Carrier

Technical specifications:

- Payload: 80kg
- Carrier weight: 25kg
- Hinge Mounted
- Swing Out
- Foldable

### Memo Europe Van Star E-Cross Carrier

Technical specifications:

- Payload: 75kg
- Carrier weight: 45kg
- Size approx: W 1700mm x 650/280mm x H 525mm
- Hinge Mounted
- Swing Out
- Foldable

Velospace XT2

Easyfold XT2

### Thule Velospace XT2

- Payload: 60kg
- Carries: 2 bikes or e-bikes
- Towbar Mounted

### Thule Easyfold XT2

- Payload: 60kg
- Carries: 2 bikes or e-bikes
- Towbar Mounted
- Foldable

# Air Suspension

## Supplying and fitting Van and Motorhome Air Suspension

Vehicles that are based on a van chassis with leaf spring suspension have a tailored kit built exactly for the make and model of the vehicle. The bellows are installed between the leaf spring to assist your existing suspension.

Alongside the bellows, a compressor is fitted to provide convenient inflate or deflate adjustment via the control panel. This gives you full control from the driver's seat to adjust both the comfort and ride of your vehicle, as well as the ability to raise the rear when clearing an obstacle (like a ferry for example).

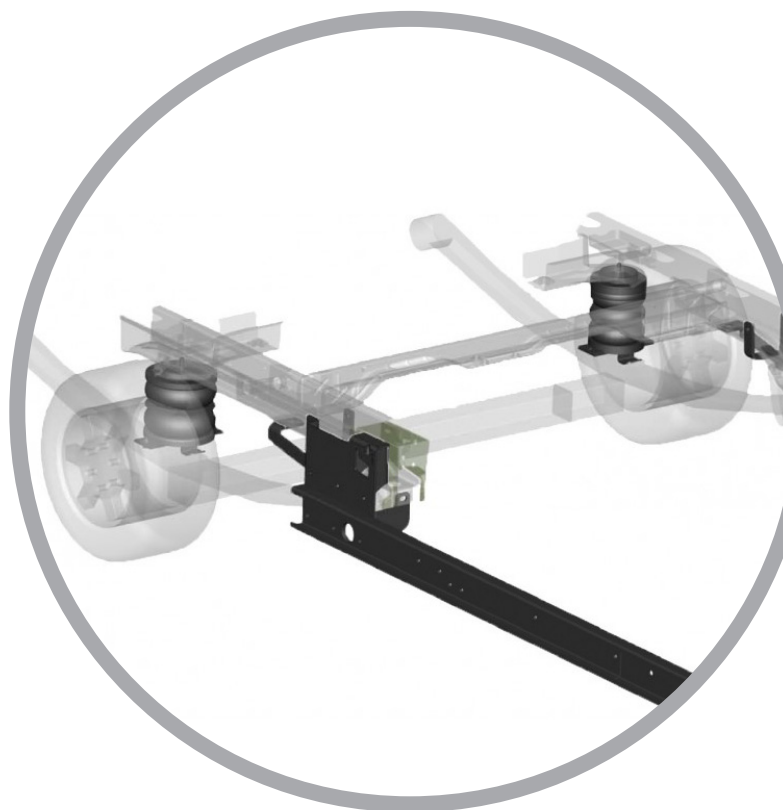

For vehicles on an ALKO AMC chassis, we have a dedicated, TUV approved kit.

The bellows are fitted using specially designed brackets between the swinging arm suspension and the vehicle chassis, again assisting the existing suspension to provide incredible ride comfort and increased safety to your motorhome journey.

ALKO based vehicles with two rear axles are installed with an extra set of bellows and brackets so that all axles are provided with the air assistance, providing increased safety and ride comfort.

air suspension

# Satellite & Motorhome Wi-Fi

## Satellite TV

LNB Towbars provide a range of satellite TV solutions to meet your needs. As dealers for British-built brand Maxview, we have a range of satellite sizes, products and specifications for every desired application and budget.

- Simple to use portable systems.
- Roof mounted crank up satellite dish.
- Roof mounted dome with automatic search.
- Roof mounted satellite dish with auto raise, auto search and auto skew.
- SkyQ-compatible systems.

For more details on our range of Maxview Satellites or technical specifications, please ask a member of our team.

Suppliers of:

## Wi-Fi Systems

LNB Towbars provide powerful mobile Wi-Fi solutions designed to provide uncompromised internet connectivity even in remote locations.

Our powerful roof mounted antennas have been designed to maximise 3G, 4G and even 5G signal.

The router is designed to work with any data service provider alongside your choice of Pay As You Go or Monthly Contract sim cards.

# Driving

## Alpine Motorhome Interface

- **Easy To Use** – Alpine's interface is very simple to navigate and user friendly. Perfect for driving long distances.
- **Large Touchscreen Interface** - Most systems have a 9" touchscreen display with split screen option integrated so you can have navigation and audio playback controls simultaneously.
- **Motorhome Navigation** – On specific models, you can enter the dimensions of your motorhome into the navigation system. This will then calculate a route suitable for your vehicle to avoid any unwanted issues on your journey.
- **Great Quality Sound System** – With the Alpine speaker system, you can enjoy a fantastic sound system to make your travelling more relaxing.
- **Camera Integration** – your rear-view camera can be displayed directly onto your Alpine head unit instead of having another screen installed to your dashboard.

Suppliers of:

## Reversing Cameras

Driving a large motorhome with no side or rear windows to easily see out can be tricky. Even more so if you are towing or trying to manoeuvre into a tight space.

We supply and fit quality rear view cameras. You can choose from a single rear view that is normally activated by engaging reverse, or a dual rear-view camera that can offer a downward view of the back end of the motorhome for close manoeuvring and has a rear facing camera that can act as a rear-view mirror whilst driving.

Most motorhomes have the screen mounted in place of their rear-view mirror, or alternatively we can install a dash mounted screen.

## Parking Sensors

- Our watertight sealed sensors are perfect for motorhomes, designed for long vehicles.
- Wireless technology minimises intrusion throughout the vehicle.
- Sensors come in white for a discreet look on your motorhome.
- Includes a 3-year manufacturer's warranty.

# Power

## Power Supply Products

The need for good power supply is essential in motorhoming. You need power for your everyday appliances like lights, TVs, water pumps and phone or computer charging etc. If you are off-grid for a number of days, a suitable power supply and self-sufficient charging is essential. At LNB Towbars, we offer a range of products to support all your power needs.

## Lithium Batteries

Lithium batteries are far lighter and outperform their lead acid counterparts in many aspects. They tend to have approximately 5x the cycle life and have the capability to fully discharge their stored power before dropping in voltage. This means no more power dropouts when your battery still has charge. We offer a range of battery sizes from 84ah to 200ah.

## Charging

Whether you are operating off grid or on mains hook up, having the right charging facility in your motorhome is essential. Often when you increase your battery capacity you will also need to improve your charging systems. Lithium batteries often require a higher charging amperage to initiate charging.

At LNB Towbars we provide DC to DC or battery to battery chargers to provide high level charging to your leisure batteries while your engine is running, and also smart mains chargers providing higher amperage charging to your leisure batteries when connected to electric hook-up.

## Solar Panels

Solar panels are an excellent way of charging your vehicle or leisure batteries when off grid, or when your vehicle is in outdoor storage.

LNB Towbars offer a selection of rigid or flexible solar panels fitted with high quality Bluetooth app controlled MPPT regulators, providing excellent performance charging to either the motorhome leisure batteries and/or vehicle battery (dual battery).

LNB Towbars only use the highest quality solar panels with a 20 year manufacturer's guarantee.

## Inverters

An Inverter is a device which converts 12V DC into 230V AC Electricity. 230V AC is the electricity supplied to domestic appliances like hair dryers, kettles, air conditioning etc and traditional 3-pin plug sockets. Adding an inverter offers the motorhomer the facility to use 230V AC devices in their motorhome while off-grid (not connected to a mains supply). Due to the high-power consumption of 230V devices, inverters should be used in short bursts to protect your batteries long term health.

LNB Towbars typically supply a 2000W pure sine wave inverter which can produce 2000W of continuous power and up to 4000W of power at its peak.

**If you have any questions about these products, please ask a member of our team.**

# Air Conditioning ❄️

## NCC trained installation technicians

Here at LNB Towbars, you can be sure of a high-quality installation of your Truma or Dometic air conditioning system, by our team of NCC trained technicians.

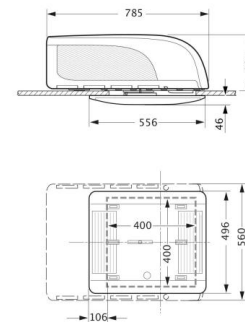

Suppliers of:

### Truma Aventa Compact & Compact Plus

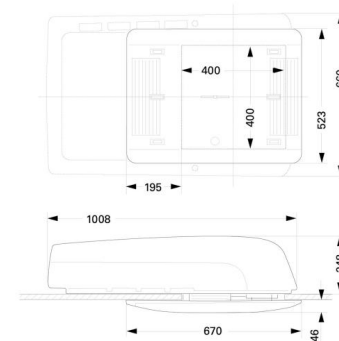

These units offers a range of benefits and are the lightest and quietest roof-mounted Air conditioning units on the market.

The **Compact** provides 1700W cooling power, ideal for motorhomes up to 6m. The **Compact Plus** provides a more powerful 2200W and can regulate motorhomes up to 7m long.

### Truma Aventa Comfort

The **Comfort** provides heating and cooling to your vehicle within a very short amount of time. Despite only weighing 33kg, it offers 2400W cooling AND 1700W heating. The air is also cleaned and dehumidified to ensure a pleasant indoor climate, no matter the weather outside. Ideally suited to larger vehicles over 7m.

### Dometic FreshJet Range

Compact and lightweight, provides a gentle yet efficient air flow. Available models are:

- **Freshjet 1700:** Vehicles up to 6m 1700W cooling / 800W heating
- **FreshJet 2200:** Vehicles up to 7m 2200W cooling / 1200W heating
- **Freshjet 3000:** Vehicles over 7m 2400W cooling

### Dometic FreshLight 2200

The world's first air conditioning with built in roof window, ensuring ideal temperatures without compromising on natural light from above.

Suitable for vehicles up to 7m in length and provides 2050W cooling with a massive 2700W heating! Perfect for cold winters away.

\* Installation of this unit requires an additional roof cut

# Motorcycle Trailers

## UNO / DUO Folding Motorbike Trailer

This fantastic high-quality motorcycle trailer is the ideal accessory for your motorcycle with a payload capacity of 431kg. By lowering to the ground via a simple winch handle allows for easy and safe loading or unloading.

The platform allows plenty of room for stepping on or off your motorcycle and the front wheel holder securely holds the motorcycle in place, allowing you to safely strap down your motorcycle to its many provided lashing points.

When not in use this trailer easily folds and stands on end, without the use of tools to allow for easy storage in minimal space.

If you have an MP3 scooter swap your front wheel holder for the MP3 bracket.

Suppliers of:

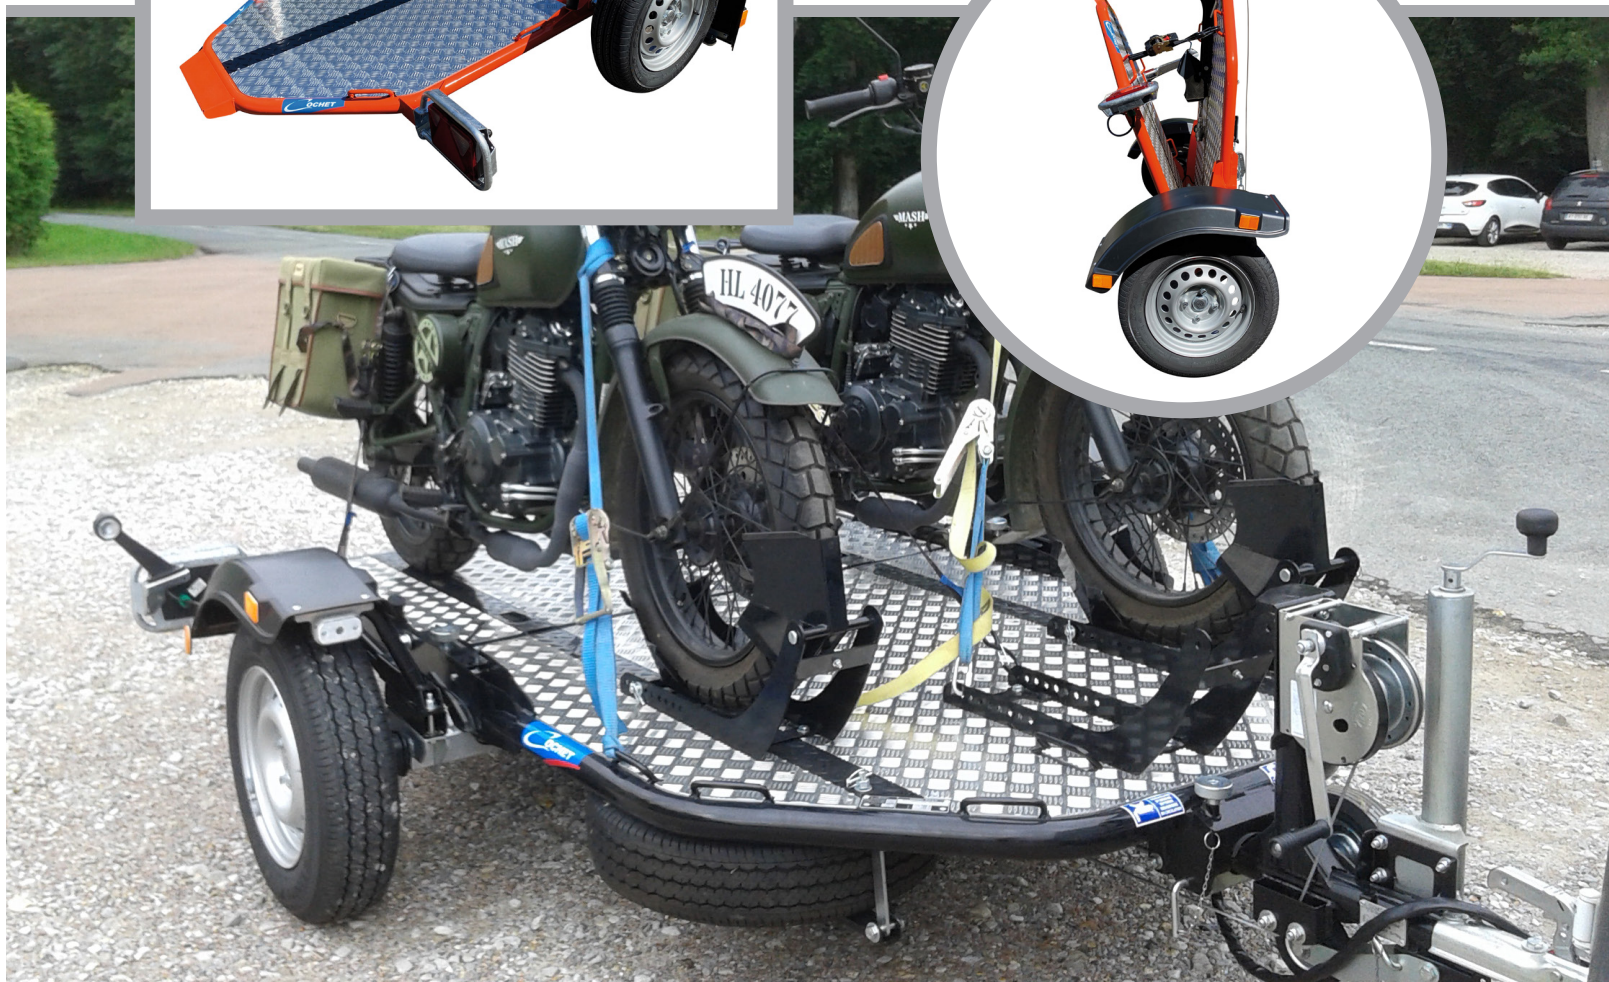

### UNO Technical details:

- Empty weight: 160kg
- Payload: 431kg
- Wheels: 155/70R13
- Wheelbase up to 1700mm
- Length: 3095mm
- Width: 1850mm
- Storage Size: H 1590mm x L 1890mm x W 830mm

### DUO Technical details:

- Empty weight: 244kgs
- Payload: 506kg
- Wheels: 165/70R14
- Wheelbase up to 1700mm
- Length: 3280mm
- Width: 2280mm
- Storage Size: H 1660mm x L 2280mm x W 1285mm

# Car Trailers

## Specialist Car Trailer Stockist

For some motorhome users, a small car trailer is desired to enable towing a small car behind their motorhome.

This may be because their car is not suitable to be adapted as a towcar using an A-Frame, or it may be the preferred method of transporting their car or cars.

LNB Towbars can help you match the correct size and style trailer for your car. We make it simple, tell our team the details of the vehicle you wish to put onto a trailer, and we will do the rest.

Using our database, we can match the vehicle dimensions and weight to the correct size trailer and tell you the price.

What could be simpler?

**For the full range contact us:**

# Motorhome Accessories

## Skid Wheels

Skid wheels provide shock absorbing protection for the rear of your vehicle, perfect to avoid those horrible grounding experiences.

Easy installation, fits Alko chassis, extensions and to most Type-Approved Towbars.

## Corner Steadies

These steadies can support 500kg on each jack and are easy to install. Each kit comes with a pair of jacks, mounting brackets and installation instructions. Ideal if your towbar requires you to remove the original corner steadies.

## Dirt Skirts

Motorhome Dirt Skirts protect whatever you are towing, or other motorists from dirt and stones when you are driving.

## Avtex TV

We offer a range of high quality Avtex TVs with different features and sizes.

This can be paired with an amazing-sounding Avtex Soundbar for the ultimate TV watching experience whilst in your motorhome.

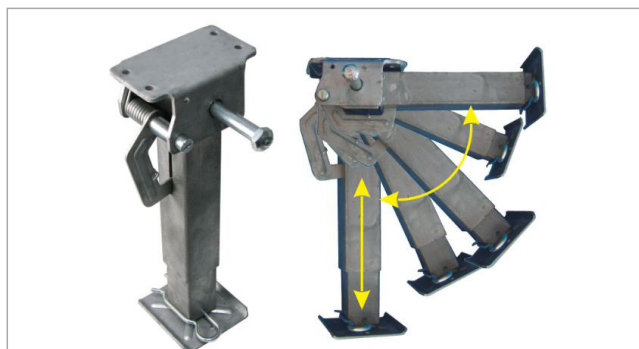

## Total Cool

Our Total Cool includes a range of Freezers, Fridges and cooling systems.

All Total Cool products run on 12V electrics and have low current usage to preserve your leisure batteries.

## Brunner

Brunner essential accessories, Plates, Tables, Chairs etc.

# About Us

## Meet the team

LNB Towbars & Vehicle Extras Limited are the go-to specialist motorhome towbar and accessory fitting centre.

From our humble beginnings in 2007, LNB Towbars has strongly focussed on providing the best quality products, best quality workmanship and best quality customer service.

We are extremely proud that our customers trust us with their precious vehicles again and again, and that they recommend their friends and family to us.

LNB Towbars is still a family business, and currently has four family members working in the company, although we like to think of the whole team as our LNB Towbars family.

The workshop consists of trained technicians with a wealth of experience and knowledge, backed by a number of systems in place to ensure that checks and double checks are carried out to guarantee the very highest of standards are always maintained.

All of our customers and their vehicles receive the same level of care. Try us, you will not be disappointed.

## Come and visit us

We invite you to come and see our showroom which boasts demonstrations of many of our products such as Automatic Self levelling Systems, Air suspension, Towmaster2 and Inisibrake, Air Conditioning, Satellite TV, Trailers and more.

- **Highest quality, no exceptions**
- **Huge stock of products**
- **Expert fitters**
- **Courtesy car**
- **Free onsite waiting room**
- **Family-run business**
